

then falling embers and burning debris means leave now, do not stay. Watering hoses fail.

### **Dress the Part**:

Breathing Gear, Masks, Scarves, Goggles, Heavy Hats, Prepare outerwear like dusters+trenches+ponchos, Thicker cotton like denim, but Wool, Leather, & Metal best. Wrap people in wet blankets.

**AVOID** man-made gear: polarfleece, plastic, nylon, vinyl **ALL THIS WILL** burn/melt/merge into your skin.

Trim and clear foliage, shrubbery, and burnable debris from structures

**Seal** Your Home From Smoke and Heat

## Pix / Docs / Media

Secure what cannot travel in fireproof safes. Wrap items in blankets within metal cans/bins and file cabinets may survive. Consider burying treasure? Wherever possible, backup data to remote locations

## Meals & Sundries:

You always need food+water and supplies for two weeks. Longer is better.

# Pyro-Cumulo-Nimbus Flows:

Smoke & Coals rise to form Storms raining Embers & Lightning Bolts starting Fires all around you

Rally Points Along Route

**Designate Remote Contact** Remember: disaster protocols will prioritize OUTGOING calls.

Practice routes and know travel times.

Service Vehicle + Transport Tickets Load transport as threat grows Pack emergency items & tools last and within reach.

Caravans prepare to leave second

vehicle behind immediately.

more passengers.

Know which goods to dump for

## **Know When To Take Shelter:**

find refuge in plowed + dirt fields, parking lots. Jump into pools, ponds, lakes & river beds, hide under bridges. Families survive by crawling single-file into culverts & drainage as fires pass.

Plan C: test-walk your foot-path out of danger

Monitor local hazards via friends, net & satellite

Expect service interruptions. As they may fail

**Three Separate Exits Minimum** 

One person leads mapping for others.

Everyone understands Exit triggers

and Map routes, if separated
